

Dignity Health Mercy Hospital of Folsom

About Us

Founded in 1989, Dignity Health - Mercy Hospital is a 106-bed, acute care, nonprofit hospital located in Folsom, California. Serving over 50,000 patients annually, the hospital offers a full complement of services including heart care, cancer care, women's health, and neurology.

Additionally, Mercy Hospital of Folsom has been recognized as an LGBTQ+ Healthcare Equality Leader by the Human Rights Campaign Foundation. It is a Joint Commission-certified Primary Stroke Center, and has been awarded the AMA/ASA's Get the Guidelines - Stroke Gold Plus Quality Achievement, recognizing the hospital's commitment to providing the best stroke care.

Mercy Hospital of Folsom shares a legacy of humankindness with Dignity Health and CommonSpirit Health, one of the nation's largest health care systems, dedicated to providing compassionate, high-quality, and affordable patient-centered care.

Dignity Health Neurological Institute of Northern California

Mercy Hospital of Folsom is part of the Dignity Health Neurological Institute of Northern California comprehensive spine care continuum. We understand the importance of an accurate diagnosis for effective spine care. Our comprehensive diagnostic options, including CT scans, spinal X-rays and other available tests, help us precisely identify your condition. With this knowledge, our team of experts collaborates to develop a personalized treatment plan tailored to your unique spine condition, physical health, lifestyle and other relevant factors.

We offer a variety of treatment options to address your spine condition effectively. Physical therapy, steroid injections and medications are among some of the non-surgical approaches we offer. In certain cases, a surgical procedure may be recommended.

Our surgical offerings include minimally invasive procedures with the Mazor XTM Robotic Guidance System.

We offer treatment and services for:

- Back pain
- Herniated disc
- Lumbar spinal stenosis
- Radiculopathy
- Scoliosis
- Spinal cord injury
- Spinal deformity
- Spinal fractures
- Spinal tumors
